DETAILED ACTION

Drawings

1. The drawings filed on December 2, 2003 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Allowable Subject Matter

1. Claims 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance: The claims in the instant application have not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose or suggest a styling and curling hairbrush comprising an elongated tubular body having an outer shell with a longitudinal interior that is hollow forming an air channel. The air channel being open at one end and closed at the opposite end, having air exit openings extending from the air channel to the outer shell surface with at least two bristle rows. At least two air guidance elements mounted between and substantially parallel to the bristle rows, and being closed in the radial direction and forming a flow channel and opening or having openings at least toward one adjacent bristle row. An air stream divider mounted at the open end of the air channel that is adapted to divide an air stream as set forth in claim 1.

The closest prior art appears to be the Lesetar (U.S. Patent No. 3,890,984) reference. Lesetar discloses a styling and curling hairbrush comprising an elongated

tubular body (53) having an outer shell surface and a longitudinal interior hollow forming an air channel see Figures 2 and 4. The air channel is open at one end and closed at the opposite end (51) see Figure 2. At least two bristle rows (55) distributed circumferentially with respect to the tubular body and spaced apart from each other see Figure 1. However, Lesetar does not disclose at least two air guidance elements mounted between and substantially parallel to the bristle rows, or an air stream divider mounted at the open end of the air channel, which is not shown or taught by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
